## Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

## Non-Resident Students Oversight

### 1. Is your district currently a host district for a 1306 facility?

No

### 1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

Although the Carlisle Area School District is not host to a 1306 facility, the district does have Carlisle students placed in 1306 facilities outside of our district. The Student Services Department works collaboratively with the district registrar and district child accounting/PIMS staff to closely monitor these students. By attending Evaluation Report (ER) and Re-Evaluation Report (RR) and IEP meetings, and by maintaining ongoing communication with the family and the facility, the district is able to uphold its obligations as the LEA, and ensure a free and appropriate public education (FAPE) in the least restrictive environment (LRE). No barriers currently exist. As a host facility, the LEA is responsible to conduct Child Find activities in addition to the evaluation and providing FAPE. Students receiving services, at a host facility, would receive them from a certified special education teacher.

### 2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

If there was a student that was in a 1306 facility, either the Director or Assistant Director of Student Services/Special Education would contact the facility to arrange a meeting so that FAPE could be provided and continued. If our district would become a host district to a 1306 facility, the district would provide contact and meeting times for coordination. In order to facilitate a smooth transition, if the residential facility provides notice that a student is to be released from the facility, the host district should attempt to work with the resident school district to prepare for the student's discharge from the institution at least 2 weeks prior to the student's planned discharge from the residential program, if possible. If, instead of returning home, the student is moving to a residential facility in another school district, these contacts should be made with the new host district. At the meeting, the resident district will review and revise the IEP for the student to be included in the educational setting. At this time course scheduling will be discussed. Additional information regarding participation in activities will be provided to the parents.

## Incarcerated Students Oversight

1. **Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?**

No

1. **Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).**

The District recognizes our operational responsibility to offer FAPE to each student who is eligible for special education until the student turns 21 years of age. Students who turn 21 years old are entitled to finish that school term. Although no correctional institution is located in the District, if one did exist, the District would comply fully with the requirements of the IDEA and Chapter 14 regarding the identification, evaluation, placement and provision of special education services to all eligible school-age individuals housed therein. Eligible students are entitled to receive special education both when they are charged with a criminal offense and are awaiting trial, and after they have been convicted of a criminal offense. Specifically, school districts providing special education services to incarcerated school-age individuals are required to: 1. comply with the "child-find" obligations of IDEA; 2. utilize appropriate evaluation procedures and diagnostic/screening instruments to determine the eligibility and educational needs of inmates; 3. implement timely review and/or develop Individualized Education Programs (IEP) for eligible students in accordance with state and federal laws and regulations, including compliance with procedural safeguards; and 4. provide FAPE in conformity with the IEP. If a correctional institution were located in the District, the District would have a responsibility to adopt and use a system to locate and identify all students within the District's jurisdiction who are thought to be eligible and to determine those students' needs through a screening and evaluation process which meets the requirements of Chapter 14. Part of this responsibility is to provide annual public notices under Section 14.121. The District would send its annual public notice to the warden of each county jail or prison within their jurisdiction. Furthermore, the District in which local correction institutions are located must develop a systematic, on-going means of communicating with these institutions to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated, and, when deemed eligible, offered FAPE. In addition, the District may obtain information from the Department's Penn Data database to determine whether school-age inmates have been previously identified as eligible for special education by contacting the Records Center at 717-541-8575 or 1-800-945-7854. Finally, Section 614 (d) (6) (B) provides that if a child with a disability is convicted as an adult under state law and incarcerated in an adult prison, the child's IEP team may modify the child's IEP or placement notwithstanding the requirements of section 612 (a) (5) (A) and 614 (d) (1) (A) (least restrictive environment) if a bona fide security or compelling penological interest that cannot otherwise be accommodated is demonstrated. Where the continued delivery of services in a student's IEP is superseded by the

duty of the local correction institution to maintain and control security, the District must conduct an IEP meeting and revise the IEP accordingly, following the usual procedural safeguards provided for under Chapter 14.

## Least Restrictive Environment

### 1. **Review the district's data for Least Restrictive Environment. Highlight areas of improvement.**

When comparing the Special Education Data Report for the 2021-2022 school year to the Special Education Data Report for the 2022-2023 school year, the Carlisle Area School District is reporting a decrease in the percentage of students receiving special education inside the regular education classroom for 80% or more of the day. In the year 2021-2022, the percentage was 59% and in the year 2022-2023 the percentage was 57.2%. This was a very slight decrease. When reviewing the Special Education Data Report for the 2022-2023 school year, the Carlisle Area School District is slightly below the state average for special education students inside the regular education classroom for 80% or more of the day. The District is slightly above the state average for special education students inside the regular education classroom for less than 40% of the day. The District is 6.5% above the state average for special education students in other settings.

### 2. **What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?**

The Carlisle Area School District uses a universal Child Study Team (CST) process. The District utilizes a tiered system for reading K-12 that is driven by data collected through universal reading benchmark screenings. The District is beginning to pilot universal screenings for math K-5 as well as social/emotional/behavioral needs in a few elementary schools. Elementary school counselors teach classroom lessons K-5 on a weekly basis. They also work with small groups or individual students to address social-emotional needs. Morning meetings are occurring at the elementary level to proactively teach social-emotional strategies. The District has provided ongoing professional development related to trauma sensitive practices.

### 3. **Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.**

Our goal is to provide supports and services for all students within the general education classroom. With training and support via the PA Training and Technical Network (PATTAN), the PA Department of Education (PDE) and the Capital Area Intermediate Unit (CAIU), the special education teachers have moved to a more proactive approach. The district's special education teachers preview vocabulary and concepts with students so that, when they are in the regular education classes, the students will be prepared in terms of background knowledge. Reading intervention is implemented in all seven elementary schools under the explicit instruction of a reading specialist and the district continues to develop plans for the systematic behavior supports. The district continues to build upon previous training in strong lesson design, research-based instructional strategies by committing in-service days and other professional learning time. In conjunction with the district's reading department, staff deliver research-based interventions such as Wilson Reading, Foundations and SRA K-12.

4. **Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.**

The District ensures that supplementary aids and services are provided for any student with a disability to have equal access and ability to participate in extracurricular activities. Students with disabilities involved in extracurricular activities are assigned a monitor in our student information system to keep track of attendance, grades, and behavior, and collaborate with team members to ensure these areas do not become barriers to their participation. Any student placed in an out of district program has access to district extracurricular activities.

5. **Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?**

Carlisle Area School District has students receiving services in private institutions. Students are only provided services in private institutions as deemed necessary through evaluation and IEP team determinations including the parent. A representative from Carlisle Area School District participates in IEP meetings and consideration is always given to the least restrictive environment and including students with non-disabled children whenever possible. There are times that a student may be placed in a private institution through an outside agency. A representative from Carlisle Area School District participates in IEP meetings and the district continues to receive updates and notifications from the private institutions while the student is attending the private institutions. CASD team members (social worker, school counselor, principal, student services director, etc.) participate in initial/review meetings, including annual IEP and IEP revision meetings. This is when student interest in extracurricular activities are discussed and information is shared with students and families. A plan is discussed to establish action steps, if required, to ensure students have access and/or receive accommodations, if appropriate, to participate in extracurricular activities. Information regarding extracurricular activities is posted on the CASD website and shared with students and families, specific to their interests. CASD utilizes a variety of supplementary aids and services based on individual student needs and as determined by the IEP team. Examples of supplementary aids and services currently being used include: collaboration between IEP team members, paraprofessional supports, modified curriculum, assistive technology, adaptive equipment, transportation, sensory supports, social and emotional instruction, individualized behavior supports, providing research based supplemental materials, and environmental adaptations. The examples provided are a small sample of the supplementary aids and services provided to students. Supplementary aids and services are provided to all students who need them, designed to provide meaningful educational benefit, and provided in a manner that avoid stigmatizing students (Gaskin Settlement Agreement, 2005).

6. **Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)**

At the present time, the district recognizes, in order to address the number of out-of-district placements, it is imperative to improve the continuum of services. The Student Services Department is committed to increasing staffing and supports to meet the needs of students across the continuum, focusing on autism support programming and emotional support programming. Our goal is to redirect funds that are being utilized to pay for out-of-district placements into building capacity within the district to support student needs and programming.

## Positive Behavior Support

### Date of Approval

2021-01-21

### Uploaded Files

113.2 (1-2021).pdf

**1. How does the district support the emotional, social needs of students with disabilities?**

The Carlisle Area School District provides a continuum of supports and services ranging from itinerant to full-time supports. The District partners with outside providers to deliver social, emotional, behavioral supports to both in-district and out-of-district students and staff. The District maintains Emotional Support Classrooms at each level K-12 that offer itinerant, supplemental, or full-time support as needed by students. Counselors work with individual students or small groups of students to provide social, emotional, and/or behavioral counseling and lessons.

**2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.**

In the Carlisle Area School District, Safe Crisis Management (SCM) is utilized. One high school Emotional Support Teacher, one Director of Student Services and one Behavior Specialist are trainers and are re-certified annually. They train teams of teachers, counselors and administrators at the building level. The District Social Worker is also trained. District paraprofessional staff are trained in de-escalation techniques as well. With support from our school psychologist and student services department directors, teams at each building are supported in developing individual and classroom behavior plans that are positive in nature. Teams of teachers at each building develop and track individual behavior plans that allow for adjustments and revisions for any given student. The research-based training includes de-escalation. The District is committed to continuing professional learning experiences in the areas of student and staff wellness, mental health, trauma-sensitive practices, building relationships, fostering resilience, growth mindset, as well as fostering safe, inclusive classrooms and building environments.

**3. Describe the district positive school wide support programs.**

CASD School Board Policy # 113.2 outlines behavior support, and states that students with disabilities shall be educated in the least restrictive environment and shall only be placed in settings other than the regular class when the nature or severity of the student's disability is such that education in the regular education class with supplementary aids and supports cannot be achieved satisfactorily.

The IEP team for a student with disabilities shall develop a Positive Behavior Support Plan (PBSP) based on the completion of a Functional Behavior Assessment (FBA) if the student requires specific intervention(s) to address the behaviors that interfere with learning. The identification, evaluation and plan or program shall be conducted and implemented in accordance with state and federal law and regulations. The district will continue to utilize and implement school wide positive behavior supports and incorporate social/emotional learning opportunities. The Board directs that the District's behavior support program shall be based on positive rather than negative techniques to ensure that students shall be free from demeaning treatment and unreasonable use of restraints or other aversive techniques.

**4. Describe the district school-based behavior health services.**

The Carlisle Area School District is working to expand student and staff supports and services to promote individuals' safety, health, and well-being. The District is responding to the need for stronger mental health supports for students, especially following Covid-19 by partnering with Cumberland County and a private provide (TBD) to offer therapeutic counseling during the school day; evaluating and implementing a mental health screener for secondary students and partner with a care companion provider to provide resources and supports to families; and developing clear, consistent procedures and protocols. The District will also be expanding the Student Assistance Program (SAP) to the elementary level and providing ongoing staff professional development centered on student and staff wellness and mental health.

**5. Describe the district restraint procedure.**

The use of restraints shall be considered a measure of last resort and shall only be used after other less restrictive measures including de-escalation have been tried. If a restraint occurs, the parent/guardian is notified immediately and the IEP team convenes within 10 days, unless a waiver is signed. At the meeting, the need for a Functional Behavior Assessment (FBA), or a new or revised Positive Behavior Support Plan (PBSP) is discussed. All restraints are reported to the state. Behavior Support programs and plans shall include a variety of research-based techniques to develop and maintain skills that will enhance student opportunities for learning and self-fulfillment.

## **Intensive Interagency**

**Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.**

At the present time, the Carlisle Area School District has no unresolved issues with locating and ensuring a Free and Appropriate Public Education (FAPE) for any individual student, or for a particular disability category. If a problem would arise in the future, the district would contact the Capital Area Intermediate Unit (CAIU) Interagency Coordinator, Mental Health/Intellectual Developmental Disabilities (MD/IDD) agency, the Juvenile Probation Office (JPO), Children and Youth, or the Cumberland County CASSP Coordinator to schedule a team meeting. If need be, the assistance of the Regional Interagency Coordinator at PaTTAN is also requested. If the District has a student at substantial risk of waiting more than 30 days for an appropriate educational placement, staff (teachers, social worker, home school visitor, etc.) collaborate to ensure students have access to the general education curriculum and specially designed instruction through the use of technology and learning management systems. LEAs must also report students with disabilities who are placed on instruction conducted in the home or who receive homebound instruction in accordance with BEC 34 CFR §300.26(a)(1), Instruction Conducted in the Home, in the Special Education Students @ Home Reporting System, so that the Department can determine whether these students require intensive interagency coordination.

### 1Assurance Check

Assurance Check	Yes	No
The class is maintained as close as appropriate to the ebb and flow of usual school activities	Yes	
The class is located where noise will not interfere with instruction	Yes	
The class is located only in space that is designed for purposes of instruction	Yes	
The class is readily accessible	Yes	
The class is composed of at least 28 square feet per student	Yes	
The location of the class has been maintained for at least 3 school years.		No

### Transition

Description of Training			
Transition Assessment Mapping/Indicator 13 training: This session will take staff through the process of mapping out appropriate assessment administration for students grades 6-12. As a result, teachers will take away a completed guide containing which assessments to give each year and what information will be gained through the process. All areas of transition will be addressed to ensure complete and meaningful data collection which will be used to develop the rest of the IEP.

## Signatures & Affirmations

Approval Date

2022-08-09

### Uploaded Files

CASD Affirmation Statement.pdf

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
